

## CORROSION RESISTANCE WHERE IT MATTERS

bohlerstrip offers a wide standard portfolio of steel rules in stainless steel for wet conditions

New generation of cutting rule portfolio suitable for all applications where highest hygienic standards are required in particular in the food, healthcare and pharmaceutical industry.

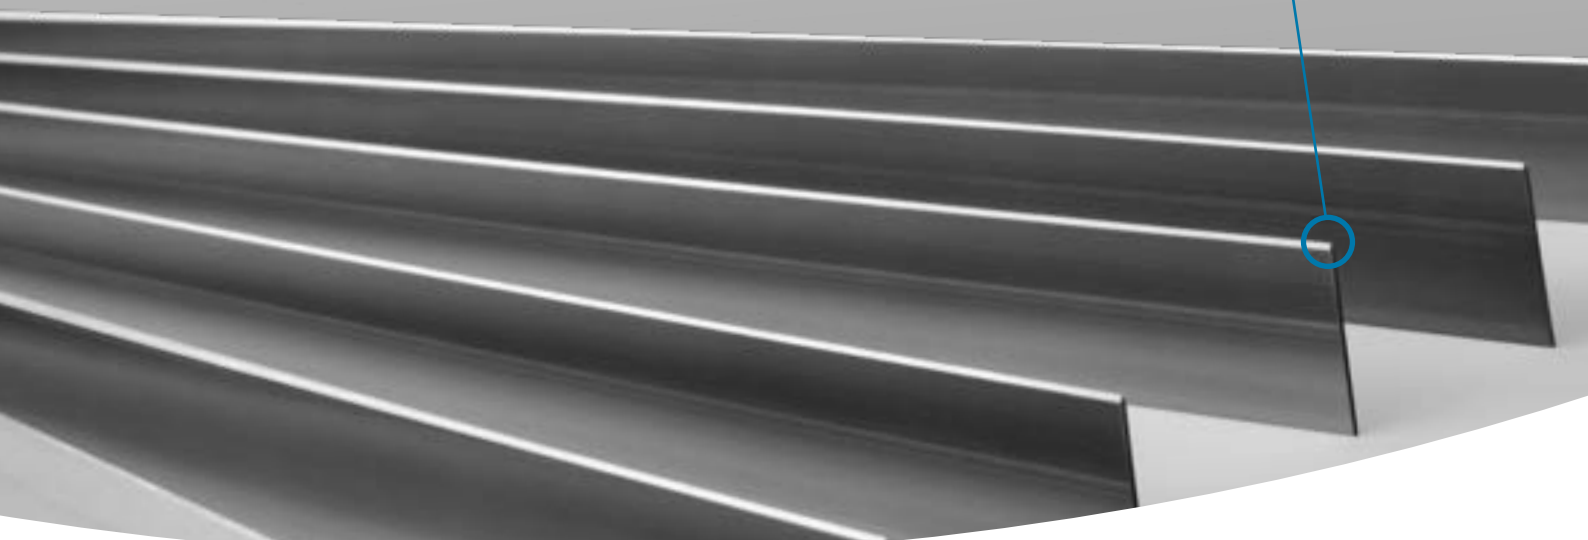

### **BENEFITS**

- » Comparable lifetime to standard carbon steel rules
- » clean cut = no dust
- » corrosion free
- » best bendability

<b>bohlerstrip stainless</b>	Hardness body ~ 430 HV Hardness tip ~ 430 HV Bevel angle 42° / 53°
<b>bohlerstrip stainless 430/600*</b>	Hardness body ~ 430 HV <b>Tip hardened &gt; 600 HV</b> Bevel angle 42°
Thickness	2 pt / 3 pt (0.71 mm, 1.05 mm)
Heights	23.80 mm (other on request)
Bevel	CF / CFDB sharp cutting edge
Bevel finish	GX fine ground

**Special feature:**  
world-wide unique and innovative tip hardened bevel > 600 HV  
(\* patent pending)

# STAINLESS SERRATED RULE

**Both worlds in one rule – aggressive tooth design meets stainless steel rule technology, world-wide unique.**

bohlerstrip offers a wide range of corrosion resistant steel grades like our standard austenitic steel 1.4310. The tooth design is suitable for applications in food industry for cutting of fruits, vegetables (e.g. potatoes for fries), foiled trays and household applications under humid conditions.

## FEATURES

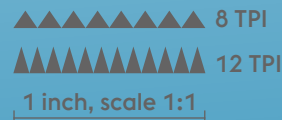

- » Deep ground teeth with aggressive tooth design
- » Side face bevel in SF/STV steep sharp
- » corrosion free, suitable for wet and hygienic conditions

„shark teeth“

<b>bohlerstrip stainless SF/STV</b>	Hardness body ~ 430 HV Hardness tip ~ 430 HV
Teeth	8 TPI / 12 TPI
Thickness	2 pt / 3 pt (0.71 mm, 1.05 mm) 4 pt (1.42 mm)
Heights	up to 100 mm possible
Bevel	SF (side face bevel)
Bevel finish	deep ground teeth

Customized product developments are welcome
